NovaTech Solutions — Annual Company Report 2025

Company Overview

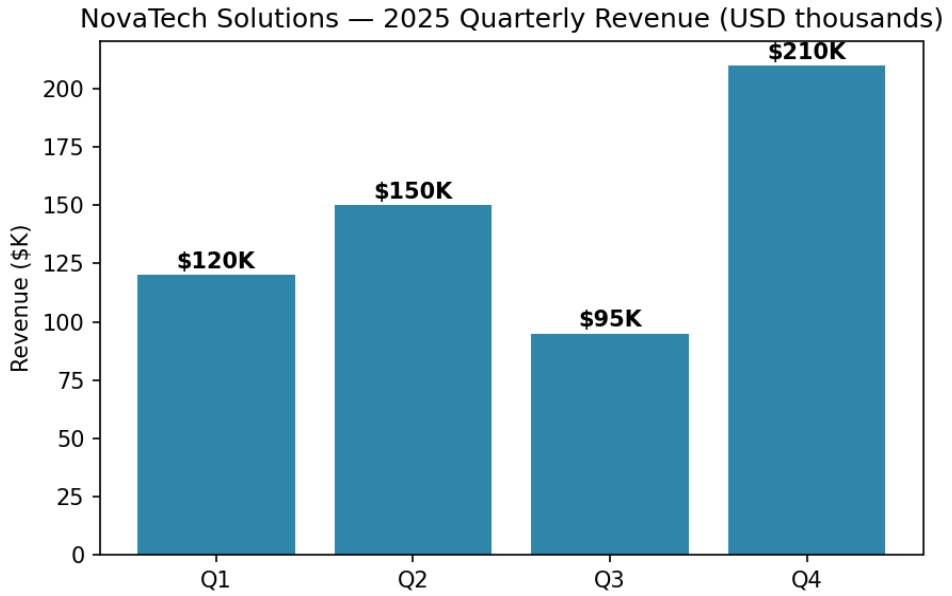
NovaTech Solutions is a mid-sized software company headquartered in Amman, Jordan, founded in 2017 by Sarah Malik. The company specializes in building cloud-based inventory management systems for retail businesses across the Middle East. As of 2025, NovaTech employs 36 people across four departments: Engineering, Marketing, Sales, and Finance.

Leadership

The company is led by CEO Sarah Malik. Reporting directly to her are four department heads: Omar Nasser leads Engineering with a team of 14 people, Lina Farouk leads Marketing with 7 people, Tarek Aziz leads Sales with 10 people, and Rima Odeh leads Finance with 5 people.

Financial Performance

NovaTech's revenue in 2025 fluctuated across quarters due to a major client contract renewal delay in Q3. Q1 revenue was $120,000, Q2 revenue rose to $150,000, Q3 dropped to $95,000 because of the renewal delay, and Q4 recovered strongly to $210,000 after the contract was signed and two new enterprise clients were onboarded. Total annual revenue for 2025 was $575,000, representing an 18% increase over 2024.



Product Strategy

NovaTech's flagship product, InventoryFlow, is used by over 200 retail businesses. In 2026, the company plans to launch a new AI-powered demand forecasting module. This module would use PySpark for distributed processing of historical sales data when a client's transaction volume exceeds 10 million records per month, since standard single-machine pandas processing becomes too slow at

that scale.

Remote Work Policy

Employees may work remotely up to three days per week, subject to manager approval. All employees must be available for core hours between 11:00 AM and 3:00 PM local time. Engineering and Finance staff are required to be in the office every Monday for the weekly planning meeting.
